CONTENTS OF VOLUME 11

Abrahamsson, K., De Silva, N. N., and **Molin, N.** Toxin production by *Clostridium botulinum*, type E, in vacuum-packed, irradiated fresh fish in relation to changes of the associated microflora, 523.
Albright, L. J. See Morita, R. Y., 221.
Alexander, M. See Potgieter, H. J., 122.
Allen, H. E. See Guthrie, R. K., 947.
Allen, O. N. See Roslycky, E. B., 95.
Bah, S. and **McKeen, W. E.** Beer-spoilage bacteria and their control with a phosphoric acid – ammonium persulfate wash, 309.
Barker, W. G. See Campbell, G., 785.
Basu, S. N. and **Datta, R.** Nutritional studies on *Pycnidiophora dispersa* Clum, with particular reference to perithecia formation, 753.
Batterham, T. J. See Weiss, U., 57.
Berk, R. S. Effect of antibacterial agents on the autoplaque phenomenon of *Pseudomonas aeruginosa*, 213.
Berliner, M. D. Effects of physiologically active chemicals and antibiotics on light emission by three basidiomycetes, 291.
Bhorjee, J. S. See Webb, S. J., 141.
Bird, F. T. On the morphology and development of insect cytoplasmic-polyhedrosis virus particles, 497.
Blumer, M. See Weiss, U., 57.
Bohinski, R. C. and **Mallette, M. F.** Behavior of *Escherichia coli* B in sulfate-limited medium, 663.
Bönicke, R. See Juhasz, S. E., 235.
Boudreault, A. See Chagnon, A., 845.
Bouillant, A. See Daniel, P., 993.
Bowers, W. D., Jr. See McClary, D. O., 447.
Bradbury, J. F. The role of the emulsifier in the fungitoxic action of polybutene emulsions, 473.
Bradford, E. B. See Gilmour, C. M., 103.
Brent, M. M. Studies on the amoeba-to-flagellate transformation of *Tetramitus rostratus*, 441.
Brossoit, J. See Chagnon, A., 1034.
Buckmire, F. L. A. and **MacLeod, R. A.** Nutrition and metabolism of marine bacteria. XIV. On the mechanism of lysis of a marine bacterium, 677.
Bu'Lock, J. D., Hamilton, D., Hulme, M. A., Powell, A. J., Smalley, H. M., Shepherd, D., and **Smith, G. N.** Metabolic development and secondary biosynthesis in *Penicillium urticae*, 765.
Campbell, G., Chan, E. C. S., and **Barker, W. G.** Growth of lettuce and cauliflower tissues in vitro and their production of antimicrobial metabolites, 785.
Campbell, J. J. R. See Strasdine, G. A., 337.
Carroll, B. J. and **Ward, B. Q.** An anaerobic culturing and sampling apparatus, 597.
Carson, K. J. See Eagon, R. G., 193, 1041.
Cato, E. P. and **Moore, W. E. C.** A routine determination of the optically active isomers of lactic acid for bacterial classification, 319.
Chadwick, P. A 4-hour bacitracin sensitivity test for identification of group A streptococci, 748.
See also Mahony, D. E., 829.
Chagnon, A. and **Brossoit, J.** Differential inactivation of some adenoviruses in an acid medium, 1034.
Chagnon, A., Gilker, J-C., and **Boudreault, A.** Infectivité et propriété hémagglutinante du virus influenza traité à différents pH, 845.
Chan, E. C. S. See Campbell, G., 785.
Chang, P-C. and **Knowles, R.** Non-symbiotic nitrogen fixation in some Quebec soils, 29.
Chase, F. E. See Robinson, J. B., 746.
Chenouda, M. S. See Osman, H. G., 619, 625.
Chung, K. L., Hawirko, R. Z., and **Isaac, P. K.** Cell wall replication in *Saccharomyces cerevisiae*, 953.
Clark, D. S. Method of estimating the bacterial population on surfaces, 407.
Improvement of spray gun method of estimating bacterial populations on surfaces, 1021.
Cole, F. E., Jr. and **Hetrick, F. M.** Persistent infection of human conjunctiva cell cultures by *Myxovirus parainfluenza* 3, 513.
Cole, S. E. See Katznelson, H., 733.

Collier, R. E. See Wooley, B. C., 279.
Colvin, J. R. The formation of spherulites in pellicles of bacterial cellulose, 641.
Cook, F. D. See Gillespie, D. C., 109; Peterson, E. A., 595.
Cooke, P. M. and **Stevenson, J. W.** An antiviral substance from *Penicillium cyaneo-fulvum* Biourge. I. Production and partial purification, 913.
An antiviral substance from *Penicillium cyaneo-fulvum* Biourge. II. Biological activities against RNA-containing viruses, 921.
Cooper, B. H. See Guthrie, R. K., 947.
Copier, H. See Weiss, U., 57.
Coukell, M. B. and **Polglase, W. J.** Acetolactate formation by streptomycin mutants of *Escherichia coli*, 905.
Coulter, W. H. See Jordan, D. C., 709.
Daniel, P. and **Bouillant, A.** Étude d'une lignée de cellules KB infectées chroniquement par le virus para-influenzae type 3. II. Nouvelles propriétés acquises par les cellules KB.EA, 993.
Date, R. A. and **Decker, A. M.** Minimal antigenic constitution of 28 strains of *Rhizobium japonicum*, 1.
Datta, R. See Basu, S. N., 753.
Davey, C. B. See Miller, R. J., 761.
Dawson, P. S. S. Continuous phased growth, with a modified chemostat, 893.
De Boer, B. See Richtarik, A. A., 637.
Decker, A. M. See Date, R. A., 1.
de Repentigny, J. See Sonea, S., 383; Viens, P., 393.
De Silva, N. N. See Abrahamsson, K., 523.
Diena, B. B., Wallace, R., and **Greenberg, L.** Reversion and biological characteristics of *Salmonella typhi* spheroplasts, 427.
See also Sato, H., 807.
Doi, R. H. See Yehle, C. O., 745.
Dumasia, M. D. See Webb, S. J., 141.
Duncan, G. R. See Ho van Hap, A., 869.
Durham, N. N. See Wingfield, D. D., 797.
Eagon, R. G. and **Carson, K. J.** Lysis of cell walls and intact cells of *Pseudomonas aeruginosa* by ethylenediamine tetraacetic acid and by lysozyme, 193.
Eagon, R. G., Simmons, G. P., and **Carson, K. J.** Evidence for the presence of ash and divalent metals in the cell wall of *Pseudomonas aeruginosa*, 1041.
Elkan, G. H. See Murphy, S. G., 1039.
Elson, H. E. See Murray, R. G. E., 547.
Estey, R. H. See Olthof, Th. H. A., 939.
Fagerson, I. S. See Walker, R. W., 229.
Fargey, T. R. See Smith, R. E., 561.
Fargey, T. R. and **Smith, R. E.** Studies on the biological stabilization of thin stillage. II. Anaerobic fermentation, 791.
Ferguson, J. K. See Guthrie, R. K., 947.
Filosa, M. F. See Weinkauff, A. M., 385.
Frappier, A. See Sonea, S., 383.
Fryer, J. L. See Spence, K. D., 397.
Furesz, J. and **Moreau, P.** Plaque formation by polio and measles viruses in BS-C-1 (Hopps) cells derived from the African green monkey, 435.
Gascon, S., Ochoa, A. G., and **Villanueva, J. R.** Production of yeast and mold protoplasts by treatment with the strepzyme of *Micromonospora* AS, 573.
Gibbons, N. E. See Onishi, H., 365, 1032.
Gilker, J-C. See Chagnon, A., 845.
Gillespie, D. C. and **Cook, F. D.** Extracellular enzymes from strains of *Sorangium*, 109.
Gilmour, C. M. and **Bradford, E. B.** Cytology of phage-infected *Streptomyces griseus* hyphae, 103.
Goodman, R. E. and **Pickett, M. J.** *Citrobacter* bacteriophages, 388.
Goos, R. D. See Stotzky, G., 853.
Goos, R. D. Growth and survival of *Histoplasma capsulatum* in soil, 979.
Gorenstein, B. See Pivnick, H., 45.
Greenberg, L. See Diena, B. B., 427; Sato, H., 807.
Griffiths, D. A. Temporary control of intertestal contamination during growth of seedlings on nutrient agar, 1025.
Grinyer, I. See Jordan, D. C., 721.
Grula, E. A. See Grula, M. M., 453.
Grula, E. A., Smith, G. L., and **Grula, M. M.** Cell division in a species of *Erwinia*. VIII. Amino acid composition of the mucopeptide in dividing and non-dividing cells, 605.

Grula, M. M. See Grula, E. A., 605.
Grula, M. M. and **Grula, E. A.** Action of cycloserine on a species of *Erwinia* with reference to cell division, 453.
Guthrie, R. K., Cooper, B. H., Ferguson, J. K., and **Allen, H. E.** Interaction between *Escherichia coli* and *Pseudomonas aeruginosa* in mixed cultures, 947.
Habeeb, A. F. S. A. See Pivnick, H., 45.
Hackeng, W. H. L. See Weiss, U., 57.
Hamilton, D. See Bu'Lock, J. D., 765.
Hauschild, A. H. W. See Pivnick, H., 45; Pakula, R., 823.
Hauschild, A. H. W. and **Pivnick, H.** Effect of carbohydrates on toxinogenesis by *Clostridium perfringens* type D, 15.
Hawirko, R. Z. See Chung, K. L., 953.
Hesseltine, C. W. See Wang, H. L., 727.
Hetrick, F. M. See Cole, F. E., Jr., 513.
Hoffmann, E. M. and **Streitfeld, M. M.** The antibiotic activity associated with preparations of delta hemolysin of *Staphylococcus aureus*, 203.
Holdeman, L. V. and **Smith, L. Ds.** A study of the nutritional requirements and toxin production of *Clostridium botulinum* type F, 1009.
Ho van Hap, A., Omelon, J. A., Duncan, G. R., and **Walker, G. C.** Trichophytons: chemical classification and the isolation of tonsopurpurin and steroid E, 869.
Hrubant, G. R. See Rhodes, R. A., 779.
Hulme, M. A. See Bu'Lock, J. D., 765.
Ingram, D. G. The production of immuno-conglutinin. VIII. The effect of 6-mercaptopurine and colchicine, 87.
The production of immuno-conglutinin. IX. In acute bacterial infections, 151.
The production of immuno-conglutinin. X. In chronic bacterial infections, 161.
